

# FORMCENTRAL

## FORMS AUTOMATION FOR MEDITECH MAGIC

FormCentral is FormFast's platform for automatic output designed specifically for the MEDITECH Magic platform. FormCentral applications include automation of packets of hospital forms and financial documents.

An essential tool for streamlining the registration process, FastPrint allows for patient information to be imprinted onto groups of electronic forms (eForms) and automatically routed to the correct printer(s).

## BAR-CODED FORMS FOR INSTANT ARCHIVAL

In addition to patient demographic information, FormCentral generates patient-specific bar-codes that allow for the completed document to be scanned directly into the EMR's archiving module.

## BENEFITS OF OUTPUT MANAGEMENT

Hospitals appreciate the productivity gains and cost savings associated with FormFast's automated output solution. There is also an improvement in patient safety as data collected in the HIS is used by the FormFast system to imprint the forms with patient demographics, ensuring positive patient ID. Plus, with print management solutions more focus can be put on patient care at points of service, rather than having to manually select, organize, and label stacks of forms, improving the patient experience.

## FORM DESIGN SIMPLIFIED

With both service and software offerings, FormFast streamlines the process of converting paper documents, electronic files, and other formats in feature-rich eForms.

## FASTER WORKFLOW AND REDUCED COST

By eliminating pre-printed forms in exchange for FormFast eForms, hospital employees spend less time & resources managing paper documents. Plus the cost reduction from replacing pre-printed forms is often significant.

## Features

- Seamless integration with the MEDITECH Magic platform
- Logic-based selection of forms
- Automatic barcoding for easy archival of documentation into the EMR

Form	Age/Sex	Room	Bed	Att
FORM001234 GSHUSE, TEST INGS THRES	58/M	N.330	1	De
